

## THE USE OF WESENSE IN NURSING HOMES

- 58% less time in wet brief
- 25% less briefs per day
- Saved 30 minutes of labor per resident per day

### THE EASY WIN-WIN SOLUTION FOR CONTINENCE MANAGEMENT

WeSense is an ecosystem that is revolutionizing elder care. It is aimed at sensing wetness events and alerting the caregivers once the incontinence product is saturated. It also provides reporting which will in turn improve both the quality of care and the quality of life of the residents while saving costs for the nursing home on continence management, waste disposal and unnecessary diaper changes.

THE EASY WIN-WIN  
SOLUTION FOR CONTINENCE  
MANAGEMENT

## VOICE OF THE COMMUNITY

### Residents

"Incontinence is unique to the individual resident"

### Families

"We put the trust back in healthcare"

### Nursing Homes

"Lower your cost and provide the highest quality care"

### Caregivers

"Less workload, more care"

## HOW IT WORKS

WeSense has three parts:

1. The disposable **Sensor** attaches to the brief and the Pod.
2. The **Pod** signals to the App when the brief needs to be changed.
3. The **App** notifies the caregiver.

## WESENSE BENEFITS

### Immediate benefits

- Less time spent in a wet brief
- Efficiency in brief checks
- Only necessary nighttime changes
- Reduced risk of UTIs

### Within 3-5 Weeks

- Increased efficiency of continence care
- Fewer briefs used per day
- Reduced waste and laundering costs

### Within 6-10 Weeks

- Fully adapted to the system
- Improved working environment
- Improved compliance
- Improved labor efficiencies

### After 3 Months

- Reliable data for administrative tasks
- Better patient outcomes
- Improved quality of life for all
- More time for other caregiving tasks
